Dr. John M. Newman*: former Army Intelligence officer; expert in Far Eastern studies; a scholar of Christian Theology and comparative religions; historian and educator; an author whose research has led to revelations about America's hidden histories. He is the author of 1992's JFK and Vietnam, 1995's Oswald and the CIA, which was updated for the 2008 edition, and 2011's Quest For The Kingdom: The Secret Teachings of Jesus in the Light of Yogic Mysticism. Dr. latest work is The Assassination of President Kennedy, Volume I: Where Angels Tread Lightly. Visit Dr. John M. Newman's Author Page at http://www.amazon.com/John-M.-Newman/e/B001IZT9DK/ref=dp_byline_cont_book_1

The Assassination of President Kennedy, Volume II: Countdown to Darkness will be published summer 2016.

Call to Action: <http://www.2017jfk.org>

Listen to Dr. Newman's 2015 interview with Alan Dale: <http://www.jfkconversations.com/>

*A note from Dr. Newman: According to CIA documents, Tony Sforza, aka Henry Sloman, was hiding in his home during the Bay of Pigs invasion. One document that speaks about this is a one-page biography of Tepedino attributed to Francisco Wilfredo "Pancho" Varona Alonso (AMCONCERT-1) that was written on 17 June 1962. The note at the bottom states that Tepedino's "father is known as Sloman. Sloman remained in hiding in his home 18-21 April 1961." The first part of that note is not true and it misled the present author during research for my current work during the summer of 2014. As Sforza's daughter, Charmaine Sforza-Flick pointed out to the author, Tepedino's father, Francesco Antonio Tepedino, was not her father.[1] Her father did use the pseudonyms Frank Stevens and Henry Sloman, as well as "Enrique," the Spanish name for Henry.

Before I met Charmaine Sforza-Flick at the AARC conference in September 2014, I had incorrectly tied Sforza to Carlos' step-father, Francesco Antonio Tepedino based on the information in Pancho's memo. After the conference I began to look into that memo in more detail and quickly discovered that Pancho had little or no facility for the English language. An English-Spanish translator would have been involved in producing the document. The translator would not have been Sforza because he knew that he was not Tepedino's father. Jefferson Morley later pointed out to me when we examined the memo closely that there is the hint of a hand edit above the word "as" which might be the word "to." This correction would change the meaning to: Tepedino's "father was known to Sloman," instead of "known as" Sloman. I now believe Morley was correct on that point.

00:00:00 (https://www.youtube.com/watch?v=oBJSIvQ_LT4)

i'd prepared an introduction of some distinction for a very distinguished presenter but in consideration of our time i'll give only of an abbreviation of what i think is warranted only the small secrets need to be protected the large ones are kept secret by public incredulity marshall mcluhan the gospel of thomas includes the following jesus said know what is in front of your face and what is hidden from you will be disclosed to you for

there is nothing hidden that will not be revealed and there is nothing buried that will not be raised our speaker is a former army intelligence officer an expert in far eastern studies a scholar of christian theology and comparative religions and historian an educator and an author whose research has led to revelations about america's hidden histories he is the author of 1992's jfk in vietnam 1995's oswald in the cia which was updated for 2008 edition and most recently 2011's quest for the kingdom the secret teachings of jesus in the light of yogic mysticism i am personally honored to introduce dr john newman and he will introduce his assistant jay welcome dr john newman

[00:02:02 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=122s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=122s)

are we live with the mic good all right i'm going to get started i have a busy agenda here with you today so oh it's a okay i just want to thank the aarc for inviting me to be here with you today and to acknowledge my long friend and colleague jay harvey who has worked tirelessly in the archives and have been with me as a discussion for 20 years since jfk in vietnam thank you jay for being there i could stand here at this podium and tell you what i prepared to say in the next hour in just five minutes instead but there's a difference between saying that something is true and proving that it's true stating opinions about the cia and its operatives is pretty easy to do proving what the facts are is much harder work we must begin with an underlying base of facts and details from this base an evidentiary hierarchy must be built any overarching theory of the jfk case must be derived from such an evidentiary hierarchy the investigation of the kennedy assassination outside of dealey plaza is the same as it is inside dealey plaza it's all a crime scene the boxes of jfk records in the national archives are still a crime scene the source of each detail like any evidence must be accounted for from crime scene to courtroom or in this case the big screens in front of you today i ask that you bear with me the technical aspects of my presentation i'm going to try and move the chains down the football field a little bit today so i'm going to have to work with you on the devil and the details

[00:04:02 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=242s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=242s)

some of the groundwork i'll put in place today comes from the first and subsequent volumes of my forthcoming new works on the case but the focus of my presentation today will be devoted to putting a fresh evidentiary base in place a base that spans from the oss and world war ii to the cia in the late 1960s i plan to do that by unmasking a few of the cia officers and operatives who are behind multiple identities that bear heavily upon the kennedy assassination case i will have something more to say about george john edey's and his boss william kent expand a little bit perhaps on what you've heard so far this morning great presentation by the way just now fantastic i'll be dealing principally with david phillips and someone who has probably known the most of you as tony forza of these two names only phillips is a true name from birth actually the middle birth name of the person using the name tony schwartz was in fact antonio so let me pose this question why are the ci's multiple identities important to this case the answer is related to something dan hardway said to me the first time we met under many cia operations there's another operation in play i refer to these as the cia's dark operations peter dale scott gave us the term deep politics the late gary webb gave us the term dark alliance in my forthcoming works i will use the terms dark operation dark operations or dark matter the cia uses pseudonyms when its operatives handle their sources more importantly they are used internally at the secret level this internal use is imperative for cia counterintelligence operations

[00:06:01 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=361s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=361s)

counterintelligence operations it makes it very difficult for moles to piece together sensitive operations it is the foundation of what is called compartmentalization in tradecraft and the need to know moreover the ci reinforces the use of multiple identities with carefully crafted deceptions in its secret cables and memos these deceptions backstop and maintain the differentiation between the different identities that belong to the same person in three secret cables i'll show you today you'll be able to see how such deliberate deceptions are used to convince those reading these cables that there are two people in the story when in fact they're both the same person i have come to the view that without unmasking the ci's pseudonyms cryptonyms and

multiple identities related to this case in the end it will not be possible to prove beyond the reasonable doubt who who's behind the assassination and how they got away with it jay the pseudonyms and multiple identities i have chosen to work on with you today were inextricably woven into a ci operation to defect and recruit rolando cabela who eventually with the support of the kennedy brothers would be used in an operation attempted operation to assassinate fidel castro we will penetrate deep inside of the cabela operation and identify who the people who managed it really were from that base we can continue to build the evidentiary hierarchy that will uncover the darkest operation that was put under play put into play underneath of the cabela operation

[00:08:00 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=480s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=480s)

operation i don't believe there was ever a darker operation than this one its intent was to play the jfk rfk plot to topple back against the president and his brother its success depended on castro being alive not dead after the kennedy assassination castro along with the soviet union had to appear to be behind the president's murder with oswald as the shooter there was a cia oswald operation to embarrass the fair play for cuba committee dan talked about it a little while ago in foreign countries that was in play in the fall of 1963. when you look at the church committee's report that describes it it's a bleak and inadequate description betrays its true function as a top shelf cover operation under which something else was really going on running underneath that supposed oswald fpcc operation was a dark op intended to tie oswald to the soviets and the cubans while he was in mexico city whether he was there or somebody else matters less than tying the oswald name to the cubans and the soviet union let's not forget that i dealt with the evidence for that part of the puzzle in the 2008 sequel to my book oswald and the cia so there's not time to go over that again today in my presentation today i will place the cabela operation into the adjacent area of the same puzzle the operation to kill the president was in play underneath both the oswald up in mexico and the cabela op to assassinate castro however it's important to note that the cabela castro operation op had an important additional ingredient the backing of the kennedy brothers my presentation to you today you're going to hear a lot about four cubans three of whom became best friends during childhood and whose destiny led them to

[00:10:01 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=601s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=601s)

childhood and whose destiny led them to create the directorial revolutionarial the dr in order to overthrow the cuban dictator fulgencio batista the group's leader was jose antonio eschevaria the second childhood friend was rolando cabela later assigned the cia crypt and imam lash and is known for the assassination plot against castro and the third is carlos cappadino gonzalez later assigned the ci crypt am whip am whip jay let's go to the next slide cuba has a history of student opposition to dictators during the early 1930s a splinter group of the federation of university students formed a secret organization to overthrow the machado dictatorship they called it the university students directorate next slide it was in this tradition that in 1956 antonio eschevario formed the secret organization known as the dr at the university of havana carlos tippedino financed the group through the profits from his jewelry business and rolando cabela became the dr second in command next slide to this group of three i had a fourth cuban he was a jewel smuggler who through family connections opportunistically insinuated himself into this childhood threesome and their secret dr his name was francisco wilfredo pancho verona alonso and he was assigned the cia cryptonium am concert one to avoid confusing him with the famous cuban leader antonio verona with whom he was not related today i'll refer to him simply as pancho easy to remember next slide the dr was active in cuba before

[00:12:00 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=720s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=720s)

the dr was active in cuba before castro's famous grandma naval expedition landed in orient province in november 1956. while castro's 26th july group was on the run on the swamps and hills eschevaria launched a bold attack on the presidential palace to assassinate batista castro selfishly disparaged the vr and called them cowards for not putting support of his own group that had their plans to topple the regime castro was reportedly relieved when the plot failed after ashavari was gunned down on the streets no new student leader appeared who could deal with castro as an equal the dr played a crucial role in the final 20 months of

the revolution and after the batista's flight it was the dr that seized control of the presidential palace and they refused to give it up to castro's 26th july elements until given posts in the new provisional government but then the last minute the dr leader at the time far shimon gave in to castro cabela however was immediately alienated by castro's move towards communism let's go to the next slide a cia man working with the ci in havana who appears in the files with the pseudonym andrew f merton had been using teppadino as an informant now tepodino made arrangements to help merton recruit cabela that attempt failed when castro suddenly sent cabela to spain as cuba's military attache cabela reportedly told his closest friends that if he didn't get out of cuba right away he would kill castro himself remark that quickly found its way to the c.i.a castro successfully isolated and split the dr which then drifted into a void many of its members were assimilated in the castro's 26th july government yet many disenchanted dr members

[00:14:01 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=841s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=841s)

yet many disenchanted dr members remained who saw castro as just another dictator was taking cuba communists and they organized clandestine opposition to his regime within 12 months they fled to the united states as political refugees there they re-adopted the name cuban student directorate the dre the dre was formed as a unilateral psychological warfare asset of the cia station in miami jm wave in the summer of 1963 lee harvey oswald became publicly involved with the dre's operations the real person behind the andrew f merton identity has been protected like fort knox for 50 years even inside the cia if this identification was known to the jfk records review board they did not release it they might not have known about it i've seen no evidence that the house select committee knew it about about it either gayton fonzie didn't write about it in his book final investigation the last investigation a lone 2008 posting on one obscure jfk website picked up the scent but was thrown off the trail by an internal roadblock set up right after the assassination the purpose of that roadblock was to decouple the man using the merton pseudonym from his long history in the cabela operation i'll get to that again after proving who merton was in this section of my presentation but when this part of the puzzle is put together it will allow us to solve much more of the puzzle including the pseudonyms nicknames the true birth name and the cia kryptonium for the person using the name tony sforza besides appearing in cuba from 1958 to 1960 andrew merton also appeared in the 1954 ci-directed coup in guatemala

[00:16:01 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=961s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=961s)

ci-directed coup in guatemala and then he reappeared again in ci operations in mexico from 1961 to 1964. this how you do it you have to have life events to associate pseudonyms that are separated in the files the cuban experts out there know who this assignment profile belongs to david atlee phillips next slide good among those good soldiers who fought fearlessly for the truth in this case and to whom we are paying tribute at this conference skating fonzie he spent time in my basement going on some of my files i remember him well fondly gayton blazed a trail like none other to light the way to phillips involvement with oswald and we're blessed and fortunate to have antonio festiana here this afternoon to tell that story for us in the 2008 sequel to my oswald book i opined that cia counterintelligence chief james jesus angleton played an important role in the plot to murder president kennedy now i want to stand with gate and fonzie and add my name to his and others who are convinced that the ci's top psychological warfare officer david phillips also played an important role i'll begin to make that case today by sharing some work i've done for the last three years on su on the pseudonyms that belonged to david phillips by the way for those philip watchers out there among you his first cia crypt in chile was a combination of the chilean digraph whatever that is and minute through one had never seen an actual for phillips before until recently anyway it's been widely known that dave phillips used the pseudonym michael cho adam the ci has not protected that identification and has even released

[00:18:01 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=1081s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=1081s)

identification and has even released cables with the name phillips hand written in over the top of the name to add many of you have probably seen these phillips was andrew merton he was also jack stewart and he was behind more than a dozen other aliases as well but the andrew merton jack stewart identification is going to

take us on a trail that begins with the dr continues the joining jam wave dre operation through the orlando cabela amlash operation and all the way to and through the 1963 oswald operation in new orleans and mexico city this trail takes us across familiar parts of the puzzle james angleton's counterintelligence staff william harvey's foreign intelligence staff and his task force w cuban ops and desmond fitzgerald special affairs staff also cuban ops this trail will also begin to shine a light on another hardly known staff element at the top of the cia the pp staff the psychological and paramilitary operations staff at the top guess who came from there howard hunt david phillips and a whole lot of the people we know and love in this case hopefully if i'm disciplined we can get to the pp staff and i'll show you some charts on that in the question and answer session that somebody will ask me to do it to get there however we must be absolutely certain of each foothold along the way we are working with a few people who appear to be many it's the pseudonyms and kryptoniums that need to be broken to put this puzzle together so let me roll up my sleeves i've already done that break out my stubby pencil that's what we use in our e in intel's on our goo horse sticks our net diagram sticks and lay the evidentiary base for this part of the puzzle just leave that there uh at this part of the presentation we'll be working principally with four documents a cia havana station cable a jm wave cable and two very critical fbi documents

[00:20:00 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=1200s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=1200s)

fbi documents as you look at these fbi memos note the assignments of the person whose name the cia still wants to be kept secret first in havana and later in mexico city these assignments match the assignment profile of phillips let's get the next slide now we'll get started with this ci havana station cable by the way my methodology i'm going to show you the doc you can't read that i'm going to blow it up in 70 font so that you can see it in the back row and if you buy the dvd it's going to be there for you so let's start with this one go ahead in the next slide so the key as you can see here is the symbiotic very close relationship between phillips and carlos tapadino after working together in cuba phillips eventually wound up in mexico city where teppodino also visited him this excerpt from the cable shows just how closely carlos trusted phillips we get to the 1962 cia cabela defection op you will see the uh that the agency played this any friend of merton card again to get tapadino's help to get the cabela next slide this one shows that uh phillips recruited tappadino around may 1958. let's go to the next one this is in the miami fbi miami office airtel and it's the first of two key mid 1962 fb documents that i mentioned a second ago as we scroll down page at a time you'll notice in the margins there's ci requests to keep stuff secret in there so i'll see even though it's an fbi document to this day they don't want us to know what's inside those redactions but the unredacted material is obviously the life story of phillips next slide let's blow some stuff up the redactor did not widen the redactions beyond the withheld words a mistake that allows freaks like me

[00:22:00 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=1320s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=1320s)

mistake that allows freaks like me to precisely count letters and spaces and fill in the blanks like playing the game hangman let's do this one in which tapadino talks about his contact in advance it's got 13 space hole into which fits perfectly the name dave space phillips let's go to the next one this one mentions phillips transfer to mexico city it's also easy to solve his name fits first into the first hole perfectly but arthur avignon was the cia deputy chief of station and after phillips left would have been a logical choice to keep running tempodino guess whose name fits into the second hole perfectly arthur avenue let's go to the next one this is the devil in the details guys is what we got to do this hoover memo to the cia is the second key fbi document i mentioned it tells the same story that originated in the miami airtel again as we scroll down one page through it you'll see the cia's uh per ci the ci wants this stuff redacted again the life story belongs to phillips let's blow some of this stuff up this one here this part of it is about tapadino's ci havana contact and it's too easy 13 spaces for dave phillips and four for the cia with a comma next slide this one about the change of tempedino c i haven't contact is just as easy eight spaces for phillips and 14 again for his replacement arthur avenue next slide we'll go back to the end of the other fbi document we can see that just below the bottom the ci still wants to keep the comparison being made between two people a secret let's blow it up let's fill in the blanks

that is crucial gem it's exactly 39 spaces and guess what amazingly fits in there dave phillips was using the curtain perfect let's go to the next one in the same area of that document this is another crucial gem with two holes containing six and eighteen spaces respectively discussing an identical

[00:24:00 \(https://www.youtube.com/watch?v=oBJSivQ_LT4&t=1440s\)](https://www.youtube.com/watch?v=oBJSivQ_LT4&t=1440s)

discussing an identical physical description guess which names fit in there perfectly merton and phillips next slide this one too about who contactedabela mexico city child's play seven spaces for the space cia next one this one too one hole for phillips and two for the cia you can see as you look through here that teppadino who had been talking with the fbi about phillips is afraid that phillips would be thinking he's working behind the cia's back okay next one now let's turn briefly to this jm wave cable and scroll down to the end of it next slide again it tells us how close phillips and teppadino were it also adds a new contact for tepadino that pancho will give him the name harvey thompson next slide here's a cia document it tells us a little more about this harvey thompson let's blow it up thompson is phil twomey meeting with any cast reliever ferrari what's his name it's also not shown here but it mentions catherine tafe about whom along with june cobb i might say something for a few minutes in a later session this afternoon next slide this is an excerpt from the cia bay of pigs history written by william pfeiffer and it tells us a lot more about phil toomey he was a close associate of phillips and was a political and psychological strategist a pp staffer next slide this is a bunch of pseudos for phillips we talked about joadan the one that's been protected so long in merton knight appears in hunt's books go to the next slide we've got a bunch more here lawrence f barker pops up in mexico city so if you see lawrence f barker it's phillips it's easy to prove somebody ask me a question douglas miguel and douglas bob lee and roberto has a lot to do with when he's uh phillips is running conti aguero a television and radio

[00:26:02 \(https://www.youtube.com/watch?v=oBJSivQ_LT4&t=1562s\)](https://www.youtube.com/watch?v=oBJSivQ_LT4&t=1562s)

conti aguero a television and radio personality in cuba and i don't have a slide for the rest of these john d nadelman was used in phillips worked with the ppop staff the ppe information coordinates cinema radio and tv and possibly neil t pickworth first used to interview and assess am core ii for conti guerrero there's also a donald barton who is phillips contact or contact of phillips related to the carnegie grower case let's go to the next slide i mentioned the roadblock set in place to decouple phillips from merton this is the cable in which it was inserted next slide we're going to blow up the top at the very top it says that joe adam a known pseudonym for phillips is negotiating with merton because we know i just showed you beyond the reasonable doubt that phillips is merten and that merton cannot be negotiating with himself what we now have is a very valuable example to exactly how compartmentalization is used inside the cia at the secret level to fragment somebody who's playing multiple roles back to the main conference title sheet let's go back to the main one let me summarize this part of my presentation by posing this question what's so crucial about the philips merten identification that it still remains classified today here are some points to consider eisenhower's policy in 57 and was to replace both batista in cuba and trujillo in the dominican republic with less corrupt and more moderate leaders believe it or not it was phillips who chose to recruit the dr for this task in cuba why because the dr was the most legitimate historically rooted cuban revolutionary group and it was not subordinate to the communist party it was phillips and teppadino who began the operation to defect and recruitabela

[00:28:01 \(https://www.youtube.com/watch?v=oBJSivQ_LT4&t=1681s\)](https://www.youtube.com/watch?v=oBJSivQ_LT4&t=1681s)

operation to defect and recruitabela the moment that castro sees power without the knowledge that phillips was murdered a critical part of philip's role on the path to the darkest operation disappears it is the merton history that takes us fromabela in cuba to oswald and mexico city after the kennedy assassination phillips had to be disconnected from that history i will end this part of my presentation with this observation phillips had to leave cuba around january 1960. jim knowl the havana station chief using the pseudo by the way olean needed someone who could handle the dr element that remainabela pancho and carlos tepodino that someone is the subject of the remainder of my presentation back to the main well you were already there all right just leave it there previously i mentioned the failure of tapadino in his case officer dave phillips to defect

cabela in january 1959. when phillips left cuba at the end of that year ci deputy chief of station arthur avignon took over tepenino's case then after cabela and teppadino was attended a student conference in switzerland in september 1960 his father called him and warned him never to come back to cuba so teppadino came to the united states using his temporary student visa meanwhile in may 1960 the remaining disaffected clandestine dr element inside cuba sprang into action they exposed themselves by openly attacking the visiting soviet vice premier anastas mccooy afterward they had no choice but to flee to miami there they became the unilateral psychological warfare asset of the jmwa station okay next one

[00:30:01 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=1801s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=1801s)

no no not the conference slide next section jay okay good we're there william kent down harvey mentioned a minute ago william w kent also known as robert k trichard also known as oliver h corbiston also known as douglas gupton reconstituted this dr remnant into the dre after working for phillips's political and psychological branch of the h4 at headquarters kent was sent to the jm wave station in miami to be the chief of the wave psychological warfare branch kent subordinate george johannitis became the case officer for the dre the dre as you've already heard ran a dark propaganda off right after the kennedy assassination suggesting that oswald's murder of president kennedy was part of a castro plot next slide william kent managed the ci's use through his dre operations of lee harvey oswald you've heard this before but i'm going to say i'm going to put it up there again house select committee investigator gate and fonzie told malcolm blunt i believe about conversation he'd had with the daughter of william kent william kent's daughter told fonzie that at a thanksgiving gathering her father made the one and only comment he ever did about the jfk assassination and that's it oswald was a useful idiot that's it next slide okay we do some quick history here during tapadino's temporary stay in new york city kennedy defeated nixon in the november 60 election and in december the united states and canada broke relations and the embassy and the cia station in havana closed in order to secure a permanent visa tempedino had to first exit and then return to the u.s so he spent the first half of march 1961 handling this in mexico city

[00:32:07 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=1927s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=1927s)

cabela just so happened to be attending a conference in mexico city at the same time and tippadino again made arrangements with phillips to defect cabela the file pseudonym for these activities of phillips was again martin the second cabela defection attempt failed and cabela returned to cuba a month later in april 61 the bay of pigs invasion failed and three months after that a ci a stay-behind agent in cuba failed in an attempt to exfiltrate cabela several days later on 16 june that same cia agent was himself successfully exfiltrated his cia cryptonium was am ry one i'll be laying out the cables and the facts that reveal who he was in this part of my presentation this morning but meanwhile carlos tepedino frustrated by all the ci's failures to defect and exfiltrate his good friend cabela dropped contact with the cia and began giving his information to the fbi at the end of 1961 the kennedy brothers created a new committee and charged it with overthrowing castro and it developed a plan we know was operation mongoose structurally it became task force w headed by the ci's foreign intelligence staff chief william king harvey at ci headquarters with the forward operations center at the jam wave station in miami in june 1962 harvey asked jm wave chief ted shackley to develop a new plan to defect orlando cabela now i am ready to take you through a close examination of this new effort to defend cabela and the key events that followed in july and august 1962 in so doing it's my intent to solve an old conundrum

[00:34:00 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=2040s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=2040s)

old conundrum what is the birth name and what was the birthplace of the person who used the names tony sforza and henry j sloman next slide the solution again requires observing how seemingly different characters undergo identical life events do a search for one name in the feral foundation and there you don't get it you have to compare the life events and search against two or three to put them together so more specifically i'm going to ask you to try as complicated as this might be to do this as we go through the next series of documents please pay attention close attention to how many characters experience the following

four life events go ahead who hid in his home to avoid the cuban police the night before the bay of pigs invasion who failed to exfiltrateabela from cuba on eight june 1961. who was exfiltrated from cuba on 16 june and finally who was the father of carlos tapadino as i mentioned earlier the ci often uses deception in their secret cables and memorandum to backstop the fragmentation of one individual into multiple identities you will see such deception take place in the jmwave cables that i'm about to show you these cables describe the new ci effort to defectabela with the help of his best friend carlos tempedino the intentional deception that takes place in these wave cables was done to hide the true identity of carlos's father now let's get to work lay in the base for this part of the puzzle let's go to the next section slide title slide

[00:36:02 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=2162s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=2162s)

good i'm going to break up this part of the presentation into four sections the new jmwave defection plan a surprise postcard fromabela to teppetino pseudonyms key events in tapadino's dad and finally solving the schwartz's sloman puzzle we will start next subtitle sheet with the cis renewed effort in 1962 to defect i recruitabela and this section will be dealing with just a single document which is this one next line wave 4746 station's response the ci headquarters let's blow some some of it up this cable references the headquarters cable asking jm wave to develop the possibleabela defection op go to the next one it shows us how pancho wanted to play a major role in this op and how he tried to use his family connections to bolster his case to do so go to the next one it gives us the jewelry business background not just for carlos but for the teppadinos period next slide it talks about the role of the childhood threesome in the dr next slide pancha talks about how great teppadino's influence is overabela's the best way to get to but here is where we need to stop and slow down and take a close look here it's important to pay attention to the fact that the author of this cable not pancho is responsible for the following two statements about henry sloman like poncho sloman works at the cijm way station in miami you don't see the names forza on memos and cables you see henry sloman first of all this wave cable states quite innocently it looks like the sloman those typically known as that well that statement would lead anyone reading it to believe that sloman

[00:38:00 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=2280s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=2280s)

reading it to believe that sloman intended as that or different two different people second this wave cable states that sloman hidden tempidino's dad's home this statement further reinforces the impression that tepadino's father and sloman can't be the same person there could be no mistake about the intent of this message henry sloman is not carlos's dad next one and finally poncho with the support of the jm wave station offered to handle the pitch to bring teppadino into the ongoing ciabela defection up as we will see this strategy immediately turned into an unanticipated debacle next section jay next section it's really great to have somebody run the slides for you so i can focus on what i have to say to not not fooled with all that stuff this section will deal with a surprise postcard fromabela to tapadino let's go to the next slide it's wave 5457. uh we won't be working from this one of this whole section it tells the story of how the news ofabela's postcard circulated and the events that took place immediately afterwards okay let's blow up some of this stuff all right theabela post guard story at jmwave began when pancho heard about it from the surviving eschevaria family acting impetuously egotistically and authoritatively pancho ordered rather than asked tepanita to call him about the postcard next slide carlos did make the call to poncho however a big problem occurred when carlos refused to give pancho any details about the card pancho now had to figure out something to save the operation and still remain a part of it so this time he politely asked teppadina to call him back that evening next slide when carlos did call back again he had not changed his mind he still refused to give pancho any details about the aboutabela's postcard but the jmw station had anticipated that this would occur and had a range for henley sloman

[00:40:01 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=2401s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=2401s)

occur and had a range for henley sloman henry sloman to be standing in the room during the second call so at this point sloman took the phone away from poncho to talk with carlos next slide so this wave cable gives us more details that are interesting such as it was tepadino's dad who failed to exfiltrateabela from cuba in

june 1961 but here again we slow down and look very closely because the author here not poncho is making two more deceptive statements about sloman first this wave cable tells us that sloman was presented to carlos using the alias Enrique and that this alias was known by Temponino's that so once again the author of the way of Kibble is trying to reinforce the message that sloman and Typo Dino's father are two different people second this wave cable states that sloman hid in Teppadino's father's home over and over these wave cables paint sloman and Teppadino's father as different people but we will soon see how the drafter of this wave cable made a crucial mistake wouldn't be carried when we compare its exact details with the previous wave cable we'll discover that the author of the second cable inadvertently gave us a crucial clue the very thing being hidden the identity of Carlos's father i'll bring us back to that discovery at the end of this section i want to finish wave 5457 first this next slide jay this wave cable tells us that the failed 61 exfiltration in Cuba a failure ascribed to tipping it was that was the reason that Carlos Tepano finally went to the FBI for help in the second phone call however Carlos's attitude towards sloman was completely different than his distaste for Pancho Carlos immediately told Solomon all the details of the postcard from Cabela next slide it was then that sloman told Carlos about the new CIA plan to defend Cabela and sloman asked Carlos for his help to pull it off go to the next one should be 16.

[00:42:00 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=2520s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=2520s)

go to the next one should be 16. yeah Carlos Tepenino not only agreed to do it but also told Slim that he would do anything to help Cabela to the sides to bring up here first of all this wave cable also further builds upon the evidence i was developing earlier it states that Carlos Tepadino knows Merton by his true name which we know is Dave Phillips and the reason that the Tepidino Merten association was brought up again in this later wave cable is to again facilitate the Harvey Thompson contact for Teppadino recall that Tippiadino said he would trust any friend of Murden and we know that Harvey Thompson is Phillips associate Toomey the psychological strategist okay now let's go to section six we'll begin this section by resolving life event one who was it that hidden his home or hidden the home of Tepiduno's dad and solving it will open the door to the resolution of life event number four the identity of Carlos Tapadino's father next slide as i indicated a moment ago we need to go back to this one here uh the first paragraph of wave five four five seven let's blow it up remember that it tells us unequivocally that Teppanino's father hid in his own home now next slide let's compare it with the third paragraph of wave 4746 blow it up this cable tells us unequivocally that it was sloman who hid in the home of Teppadino's father now you put two together and you get the crucial slip up look if Carlos's father hid in his own home and sloman's the one who hid in this home then sloman must be Carlos's father in retrospect it was the use of Poncho to get to Tapadino and Cabela that was

[00:44:00 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=2640s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=2640s)

to get to Tapadino and Cabela that was the mistake Carlos's lack of respect for Poncho made it necessary to bring in sloman and then to write about it in a cable made it very tricky language to do it and maintain that fragmentation but the discovery we made there is reinforced in concrete in the next memorandum let's go to the next one we are fortunate that as it finished its work the assassination records review board released in full this copy of Pancho's June 1962 one page biography of Carlos Tipton and they don't quote this in the wave cables let's go blow up the note at the bottom and that note Pancho completely gives away the secret being hidden in the two-way cables Henry Sloman is Teppadino's father and he sloman hid in his home during the days surrounding the Bay of Pigs invasion no dancing in the end zone yet the Henry J Sloman name is only a pseudonym we need more pieces of evidence to work with and thanks to Pancho's huge ego we can find them in the documentary record let's go to the next slide so now we fast forward downstream it's 1969. Jake Esterline has taken over the Miami station he's using the name Antony or Pine Shape by the way i've ever seen that Panchay pseudo it's it's Esther Line he's got a huge mess on his hands made by Pancho in the Miami media by making accusations against someone he calls Frank next one this Esther Line memo gives us three huge clues about this Frank first of all Frank was Pancho's case officer second Pancho was directed by Frank to introduce him as Frank Stevens a professional gambler third Frank is Enrique recall that sloman was introduced to his son Carlos on the phone as Enrique so does this leave us we know that sloman Frank Stevens and Enrique are three pseudonyms for the same person

[00:46:00 \(https://www.youtube.com/watch?v=oBJSivQ_LT4&t=2760s\)](https://www.youtube.com/watch?v=oBJSivQ_LT4&t=2760s)

three pseudonyms for the same person who is carlos tapatino's father we're not even remotely done yet next slide we now need to look at this memo that the cia special agent in charge kane sent to esterline after wrestling asked him to investigate the accusations made in the media by pancho against frank let's pull it up from this cane memo we get another important piece of the puzzle pancho himself claimed responsibility for the 16 june 61 exfiltration of tepanino's dad frank next slide now let's check out a couple more sections real quick go back to the ester line memo some more pieces in the puzzle this one here ester line tells us that earlier emilio rodriguez americo had been pancho's case officer and that it was emilio who turned pancho over to frank in november 1960. i'll come back to pancho's case officer history and my concluding remarks by the way emilio is an important guy uh for a lot of other reasons uh if it weren't for malcolm blunt i probably wouldn't have gotten as far as i did on that um and ester line confirms the 16 uh june 61x filtration of frank this next slide this is another section of the same ester line memo let's blow it up it gives us the rest of the story about the person hiding in his home or hiding in the home of tiffany's father echelon's memo tells us that it was frank stevens who hid in his home furthermore ester line explains how frank's gambling cover had served him well because it enabled his servants to convince the cuban police that he was out of his house gambling the night before the bay of pigs invasion when he was actually hiding in his home this hiding in the home story further cements the three pseudonyms frank stevens enrique and henry sloman used by carlos tepanino's father next slide at this point i want to summarize the three key life events of tepenito's dad he hid in his home

[00:48:01 \(https://www.youtube.com/watch?v=oBJSivQ_LT4&t=2881s\)](https://www.youtube.com/watch?v=oBJSivQ_LT4&t=2881s)

of tepenito's dad he hid in his home 17-21 april 61. he failed to exfiltrateabela from cuba circa 8 june and his is amri 1 and amri 1 was exfiltrated on 16 june 61. i've got a lot of documents on amri run i do not have the time to do that proof so you can throw that one out or take it on faith it'll be in my book but i don't have i only have so much time today let's go to the next section number seven okay we're almost done i have two remaining tasks first to prove that the above three aliases belong to tony's forza and second to reveal the birth name of the person using the name sporsa and his aliases and nicknames next slide let's go back to the cane memo again blow it up kane states the pancho said jack stewart pseudonym phillips i mentioned earlier was his first contact during 1959 in cuba that's incorrect ester line actually said that phillips recruited pancho sometime during 1957 and will add that detail to my big net diagram at the end next slide but the cane memo also tells us two more things about this frank stevens that he learned from poncho number one frank was a cia supervisor in the cuban program at jm wave number two frank had earlier served in argentina any clues for those out there that those two details belong to tony's sforza who used the name sarno in the church committee deposition and that is schwartz's life event right there those two things as you can see we're on the verge of adding sports into the mix of identities being used by a single individual who is carlos's dad

[00:50:02 \(https://www.youtube.com/watch?v=oBJSivQ_LT4&t=3002s\)](https://www.youtube.com/watch?v=oBJSivQ_LT4&t=3002s)

a single individual who is carlos's dad we have another huge piece of evidence to buttress this let's go to the next one i'm now ready to turn to a beautiful cane memo that resulted from the same mess pancho made in the media but this one was sent to headquarters where there was apparently some difficulty figuring out who frank really was next here king gives away a crucial clue at the very center of the puzzle the frank referred to by poncho was the subject of ci headquarters file 53472 and guess what next slide we got it task force memo in 1962 about that this and it's a domestic alias documentation for four people by the way the name being withheld at the top of the list is emilio that's emilio anyway let's blow up the part we really need the big news is that number that i just mentioned for frank 53472 clearly belongs to tony's forza now we have four names for carlos tepenino's father tony schwarzer henry sloman frank stevens and enrique next slide now if i can resort to the wizard of oz analogy let's pull back the curtain to find the man in the control booth projecting all these names we'll start with this cia document about the 1965 polygraph of carlos tapadino blow it up this ci document tells us that carlos tippetino is an adopted name it also tells us that his true name before the

change was carlos ignacio lopez now note here that lopez's new step-dad when he adopts carlos he's not using the name sports that he's using his real name antonio teppadino we'll get to that anyway let's blow up uh this handwritten note here ci handwritten notes on tapatino's biological parents and you will see mom is amata gonzalez pop ignacio lopez

[00:52:03 \(https://www.youtube.com/watch?v=oBJSivQ_LT4&t=3123s\)](https://www.youtube.com/watch?v=oBJSivQ_LT4&t=3123s)

let's go to the next document this is from um teppadino's 1965 personal record questionnaire and i made a composite out of that and i'm going to blow up the parts that we really need to look at yeah okay carlos's biological father ignacio lopez was born in 1900 in havana cuba and died in 1950. carlos's adoptive father and there's the name antonio teppadino it's actually francesco antonio tepadino was born not in ohio which is his cover story 1900 in salerno italy in a moment i'm going to show you from ancestry.com the whole four or five generations of the temporinos in salerno are going back but here we might interject this rhetorical question why is a man i'm talking about carlos in his late 40s who's married and has a daughter getting a new stepfather anyway all right let's go to the next slide to finish up here i have one more document uh that where we use the ci uses the name stepfather and it's that same trip i mentioned earlierabela going with tapadino to the switzerland conference go to the next slide and it's the stepfather that makes the call stepfather who makes the call telling them not to come back to cuba all right time to finish this puzzle let's go to the next section jay and remember you're going to have to um good just leave it ah it's good yeah just go there we go this is in that diagram

[00:54:00 \(https://www.youtube.com/watch?v=oBJSivQ_LT4&t=3240s\)](https://www.youtube.com/watch?v=oBJSivQ_LT4&t=3240s)

that summarizes everything i just told you for the last last few minutes so we're gonna just i'm gonna leave it there for a while there's the name at the top and there are the life events that pertain to him that the some of his pseudos all experienced in one line right there across the middle sportza stevens enrique and sloma the stepfather's relationship to carlos and i can't really see the dates i have on there i put that 1950 that's when that happens and then the case officer status with poncho that happens in 1960. underneath you see the earlier recruitment of them all by dave phillips so this little net diagram says a lot of things i want to make some comments on it i'll call them fat francesco antonio tepodino fat was brought into a van at the request of chief of station jim noel in the fall of 1960. in his deposition of the church committee using the ailes alfred sarno francesco did not say exactly what the cia chief of station wanted to do but i have an idea there were three crucial reasons why jim noel wanted him for that cuba assignment first of all someone was needed to fill in as the case officer for the dr leadership that phillips had recruited in 1957. second of all the break with cuba the coming break was only months away so noel needed someone a new case officer to come in without state department cover he would have to be deep undercover without uh and and function as a ci station uh stay behind agent not for station the cia stay behind agent that was his gambling cover but what made francesco antonio tepodino uniquely qualified for this role was that he had knownabela for about 10 years but also

[00:56:00 \(https://www.youtube.com/watch?v=oBJSivQ_LT4&t=3360s\)](https://www.youtube.com/watch?v=oBJSivQ_LT4&t=3360s)

10 years but also the other important guy remaining carlos teppadino was his stepson that's why sports was moved from argentina he was actually called tony argentina left his family there and came back to run teppadino andabela emilia rodriguez was handling poncho until francesco arrived francesco assumed case officer status of pancho november 1960. it was just months earlier that the annie castro dr remnant in cuba had come out into the open attacking mccoy and had to flee francesco antonio tapped into a rise at jm wave in june 61 and poncho gets there eventually in march of 62 still under francesco's case officer supervision after the newabela op is underway joe anitis takes over his case officer for pancho even though i have uh established that the true name behind all these names is actually francisco integrity i'm going to continue to refer to him as forza for everybody's sake in here that's like a name that's not going to go away so we'll just call them sports next slide please just turn that clockwise i've eliminated all the children here and just ran back through five generations uh last names tepidino the first and middle name are always francesco antonio

or antonio francesco simply reversed every generation the real sun you see on the left antonio tepedino would have been antonio francesco teppetino died in a car accident in 1961 in new york and that's in that pancho bio of tapatino so carlos is the steps on the real sun in the same line of all those names died he was in the jewelry business still up in new york in a car accident next slide

[00:58:02 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=3482s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=3482s)

in a car accident next slide you can pretty much read this for yourself this is like bringing some of the data in off the ancestry stuff and and elsewhere of all these tempathinos including the the son that died in new york in 61. they all come from soleno italy it was francesco and tiffany's dad who actually immigrated to new york and he had already been born in salerno but he arrives and they're american citizens next slide if we get to it as i said uh in the q a i'm willing to talk to you and show you some stuff a little bit about the history of the pp staff of the psychological warfare function from the time of the oss up to the late 60s involving like i said some of the your very favorite characters in this case go back to the main conference title slide please okay leave it there i begin my concluding remarks by returning to the ci's methods of using pseudonyms and kryptonites to compartmentalize covert ops the agency's use of such methods is no longer a secret the fragmentation of these dark operations and activities of cia staff officers and contract agents 50 years ago is something we must defragment today if in 1976 we had known johannides was the man behind the pseudonym walter d newby the ci would never have been able to get away with the outright perfecty of sneaking the fox into the hen house to wit using the dre case officer as the agency liaison to the house household committee you heard a really totally fascinating presentation about that just now this morning to this very day the cia is still hiding the identities of its officers who ran the operation to recruit and steer land of and to the plot to kill fidel

[01:00:01 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=3601s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=3601s)

land of and to the plot to kill fidel castro we need to identify them all for in their midst someone was running a more sinister operation under that one castro would be alive and appear to be using oswald to assassinate president kennedy so resolving these issues surrounding the ci's multiple identities and pseudonyms helps us to piece together the true story of oswald and the cia and and this comes to something jim lazar and has been doing all this time it enables us to make stronger cases for freedom of information act filings having the facts and the crips in the pseudos doesn't hurt us when you come before a judge and ask for files to be loosed let's go to the next slide please four decades ago a cia staff officer george dean edis handled the directorate of operations account for the agent's liaison and as you've heard this morning his role as the case officer for the dre was a dark op and it was withheld from the aids on the house select committee but john edis was a greek staff officer working at the cijm wave station in miami with this pseudonym as dan said walter the he had been the senior case officer in charge of the i operations at the time of their associate with oswald of new orleans and under joe nady's supervision the aria launched its public campaign just hours after the president's death designed to help link oswald to a supposed castro plot that campaign was part and parcel of the darkest operation i mentioned at the beginning of my presentation to play the jfk rfk plan to take al castro back against his brother president and his brother in the 2008 edition of my oswald and the ci i wrote about oswald's mexico city trip and about england's possible role in the counter-intelligence part of this plot placing the world war iii virus into oswald's files in an ingenious manner so as not

[01:02:01 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=3721s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=3721s)

files in an ingenious manner so as not to let it balloon up until the day of president president's murder it's a detailed plan and it's not something i can break into detail here i did that before i spent a lot of time in that edition of the book in addition to tying oswald to castro the mexico city up oswald operation also implicated the kgb in the murder too and dave phillips was heavily involved in several parts of this in fact dan did such a good job talking about his movements back and forth headquarters jm wave and mexico city at the crucial time of the communication that's one thing he didn't is the cables going back and forth between headquarters ci and the station observing or thinking they're observing oswald down there and phillips is all around that's

that's exactly when he's down at jmwave those few days that's when all this stuff goes back and forth and the routing slips that are covering those things that we now have which they would not show to the house select committee okay really help inform us about who at headquarters and its ci ops and names that we have now that the the records review board lifted the redactions on that help us know some of the people who knew about what was going on when we put all the pieces of this plot together we can see how this dark operation in play underneath the top shell operations did more than achieve the death of jfk it was a malevolent and diabolical psychological warfare plot convincing robert kennedy he had just got his brother killed and set the stage for world war iii and in addition to that terrorizing several august members of our government with the prospect that such a terrible event would befall the world unless they helped engineer a lone gunman cover-up next slide now i want to take an aside and address the possibility of a joe anita's part two story see joe needs may have

[01:04:01 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=3841s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=3841s)

part two story see joe needs may have been the case officer for another part of that same doc dark operation and this part too was hidden from the house select committee remember that in june 62 headquarters asked wave uh told way they were interested in defecting cabela again and they attempted to use him in the plot to assassinate fidel castro at wave it was wilfredo ponce francisco pancho verona who identified tempathena was the key to doing this to get to cabela and it was at this decisive moment that pancho's case officer tony sforza turned pancho over to a greek case officer who was working in the jam wave station the jm wave station then used pancho tapadino and tempina's step dad schwarze to set up the recruitment of cabela this greek case officer handled pancho for the next three years until the cabela op was blown and he was arrested and tried in cuba one might be justified in marveling at just how many greek case officers were running cubans at jmwave at the same time the 1962 jam wave cabela op was carried out in conjunction with cabela's participation at the eighth world festival of youth and students in helsinki finland one of joe anitti's fitness reports the one in 1962 is really interesting it indicates that he was the case officer for not one but two different hemisphere-wide students and teachers organizations engaged in political action propaganda and intelligence collection two among the items that jim lazar has put forward in the blakey hardway lopez for you filing this went down a couple of weeks ago has been filed is a request for the release of any ci files that may help us determine if joe andes was in fact the greek case officer involved in these activities

[01:06:00 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=3960s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=3960s)

activities next slide finally let me close with this observation on the warren commission 50 years out we began with a cover-up by the warren commission as lyndon johnson used the threat of world war iii as a battering ram to create and use the commission it was not a difficult endeavor i believe it is no longer conjecture but it is a fact that the world war iii groundwork had already been cooked in the ci's oswald files before the assassination 12 years later the house select committee and other committees of congress and the senate begun opening the door to the truth their collective works have helped confirm what most people have long suspected the murder of president john f kennedy was a conspiracy after all the warren commission got it wrong oliver stone's film jfk provoked the bipartisan passage of the jk records act in the 1990s and 4 million pages of assassination records were subsequently placed in the national archives now we can read the transcripts and even listen to the phone conversations that reveal how johnson cajoled senator russell to serve on the commission and exactly how lbj used the threat of world war iii and 40 million dead americans to force chief justice earl warren into doing what he had refused three times to do twice to robert kennedy and the first time to johnson until confronted with that terrible threat namely to head up the commission that bears his name today fifty years after the publication of the warren commission report it has become clear that it was not just wrong the longer that we have to study the case the wronger the commission's findings become in a nutshell i'll put it that way the longer the wronger thank you very much i'll be happy to um take any questions that you might have

[01:08:06 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=4086s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=4086s)

ladies first all right hey john thank you for that very interesting i'm dying to read the rest of the story there i have a question because you keep talking about robert kennedy being behind the castro assassination plots and i'm sure you've read helm's testimony where he says he lied to dez fitzgerald when he told him that he had kennedy's approval when he actually didn't to approach cubella and i'm sure you've read the um the castro uh ig report that's where the ci asks itself can we state that we had executive authority and they answered their own question not in this case regarding the plots and they say we told rfk about the plots that had ended but not the plots that are continuing and then of course there's the word of kennedy himself because this came out during robert kennedy's time and he's like i'm the guy who who turned off the operations and cy hirsch reported that adam wilinski had said um i that that robert ketty had told him he got in writing something from the cia that they would not kill castro so how does that fit in with what you're saying believe that they weren't going to kill castro i'm so i'm with you on that but i think we could also cite a number of things that would indicate the reverse why would the cia admit in their own secret document that was four copies only never supposed to be released that did actually get pried out by the arb that wouldn't have been released otherwise where the ci says in its own it's kind of like the kid with his hand in the cookie jar and he says oh i didn't steal the cookie but then he goes and writes in his diary yeah i stole the cookie which are you going to believe the kid who says i didn't steal it or what he wrote in his diary only that it makes imminent sense for to convince robert kennedy that the plan he had been part of was what god his brother killed i i get that and i could do i i agree that as a theory that works really well

[01:10:01 \(https://www.youtube.com/watch?v=oBJSivQ_LT4&t=4201s\)](https://www.youtube.com/watch?v=oBJSivQ_LT4&t=4201s)

that as a theory that works really well but it equal it works equally well if it just is out there to convince the public of that regardless robert kennedy was shut down by his own grief he didn't mean i need to make a couple of comments first of all while the air force one was still in the air whoever got on the phone and told rfk uh that they had this the president's shooter oswald was his name and he'd been to cuba several times wouldn't tell us what he went there for um when you think about what's going through rfk's mind and doesn't he go to somebody somebody help me out and say he was one of he was his first call was to the cia the emergency ci aligning basically said did you guys kill my brother that was kennedy's friend he said he was one of it was one of yours paulino that was that was later yeah where he said it was one of yours but his first call was to the cia did you kill my brother right exactly so also if you think about this a little bit deeper what is desmond fitzgerald doing with the poison pen and jess well it's funny because david phillips in his own book says it wasn't desmond fitzgerald who gave him the pen it was actually the case officer and he also says it didn't happen on november 22nd so it happened october 29th and i just found one what is your purpose of doing that in the first place why if we don't want castro to die oh no they want people to think that they can't just play along with it you know you got to put your other hat on here for a second it would be because they want that in the record that they wanted castro that they were hiding from the fact that there is actually another operation on a play which castro cannot die he's got to live right so it makes perfect sense when you understand how this works to go give him a poison pen right i'm with you a hundred like there's a legitimate up for cubella to kill castro and so that's the way you have to look at that i i totally i agree with a hundred percent of everything you say with the one

[01:12:00 \(https://www.youtube.com/watch?v=oBJSivQ_LT4&t=4320s\)](https://www.youtube.com/watch?v=oBJSivQ_LT4&t=4320s)

everything you say with the one exception that i don't believe from the record that rfk ever authorized such a plot but the cia needed to make it look like he had to fulfill them like i said i'll give you either way on this i could we could we could talk for hours and we're going to point there's other people in the room here yeah uh about that part so if we agree with everything else i dr newman i've read one of your books um lamar waldron in his book last year uh on the kennedy assassinated assassination reported that david atley phillips recruited vincent bigiosi before he died to write his book reclaiming history reclaiming history is like gerald postner's book case close is written for an elite audience primarily journalists predisposed to believe the government's false version of events informed people in europe and asia have known for decades the truth about jfk assassination what do you think that we and thousands of others before us have not been able to break through here in the united states to bring the truth to the american people well one of the main reasons

of what i was talking about today if you can't identify the characters because they've been fragmented into hundreds of pieces you can't put the story together and it's not just done to confuse us as i said it was done internally so it's very confusing even for people inside the cia one person can be at one desk three deaths down does not know does not have a need to know what that other guy is doing only the people at the staff level have talked about the pp staff talk about ci staff talk about

[01:14:00 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=4440s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=4440s)

staff talk about fy staff those guys all go back to the oss almost all of them they've been around they're the only people who know what's going on and how the pp staff infiltrates the director of operations and runs its own ops underneath ops and we have information so until you can do that you don't know the story and we're just kind of lost in space trying to figure out who's doing what so when you talk about shots in dealey plaza and doing that side of the case is one thing but when you start talking about especially who in the cia might have known before the fact or what they might have done as part of it is difficult to do until we get the crips the pseudos and the nicknames and all that stuff in the open and the clear and we need more foia filings and we need access to the documents to do it the routing slips the stuff malcolm blunt's been talking about all the internal distribution those are the things we need and without those things that's the answer to the question we're not we're not going to be able to get very far thank you dr newman thank you very much in the in when we were working at the committee i used to have a con running argument with bob blakey bob insisted that we were looking for evidentiary proof proof beyond a reasonable doubt and i would always argue that in order to understand the cia or any possible cia involvement in this in the assassination we had to analyze it as an intelligence operation and use intelligence operation data and analysis to reach an operational level of decision which may never really come to a proof beyond a reasonable doubt that was what analysis technique that me and ed tried to train ourselves to do in the short time that we had with the documents we had to work with what i'm hearing you say today is as an

[01:16:02 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=4562s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=4562s)

what i'm hearing you say today is as an intelligence analyst and i really appreciate your background in that you think that you can go from the intelligence and analysis level to actual proof beyond a reasonable doubt do you think that from a legal standard the work that you're doing and the work that could be done at this point could actually rise to that level of not only probable cause but being able to prove beyond a reasonable doubt an actual involvement of the agencies in a conspiracy yeah that's a good question you're better qualified than i am that i'm not a lawyer right but that's the idea uh before a jury or before a judge is beyond the reasonable doubt um and so and notwithstanding your point lisa maybe robert kennedy had nothing to do with i know of a lot of things too and i just don't have a long conversation about that right now it wasn't my point to come here today but we you know we we must start with facts and then build that evidentiary base and without that of a different base you don't have a you don't have beyond a reasonable doubt you can't go there jim but yeah so they can get them up the pp staff thing yeah i think it gets uh back to the point made earlier that where you establish that someone under suspicion is lying you have deprived him of credibility so you can meet the beyond a reasonable doubt standard we should thank dr newman and that's for sure and we should recommend that there will be a panel discussion

[01:18:01 \(https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=4681s\)](https://www.youtube.com/watch?v=oBJSIvQ_LT4&t=4681s)

will be a panel discussion when we return jefferson morley is presenting as close to 130 as possible thereafter we will be joined by dr newman and david talbot by telephone but we really should thank dr newman very much and break for lunch

END
